Feedbacks of Stakeholders

Based on the feedback from nine respondents, here is a summary of the responses regarding the Carbon Reduction Insights:

Awareness and Importance:

Most respondents are either "Very familiar" or "Somewhat familiar" with carbon footprints, though three indicated they have "Heard about it but not sure". Seven out of nine respondents believe reducing carbon footprints is "Very important," while the remaining two consider it "Important".

Emission Sources:

Respondents frequently identified transportation, electricity usage, waste generation, and industrial activities as the primary contributors to daily carbon emissions.

Dashboard Interest and Features:

Interest: Most respondents (7 out of 9) are definitely interested in a dashboard featuring real-life case studies of carbon reduction, while two responded "Maybe".

Useful Features: Highly requested features include carbon emission data visualizations, real-life sustainability case studies, cost savings from sustainable practices, and “what-if” scenario simulations.

Visualization Format: Graphs, charts, and interactive dashboards are the most preferred formats for understanding data.

Impact: All respondents agree (with 6 out of 9 strongly agreeing) that data visualization can help people adopt sustainable practices.

Current Sustainable Practices: Respondents reported various daily practices, including using public transport or cycling, reducing plastic and

food waste, conserving electricity and water, and using electric vehicles or digital notes.

Proposed Additional Features:

- Personalized carbon footprint tracking and calculators based on daily activities.
- Goal-setting with progress indicators and comparisons with averages.
- Real-time tracking of energy usage and integration with smart devices.
- Gamification elements like rewards, badges, or leaderboards to boost engagement.

Suggestions for Improvement:

Recommendations include making the dashboard user-friendly and simple, adding real-time data tracking, and incorporating AI-based recommendations. Other suggestions include creating a mobile app version and offering community challenges or educational content.

Details of the Responders:

- Neelay Thummar – BBA
- Yashvi Shah – BBA
- Tanisha – Business Owner
- Dakshraj Singh Chandawat – BCA
- Adarsh Gupta – BCA
- Riti Kumar Singh – BCA
- Vansh Nakrani – B.Com
- Jash Lakdawala – B.Com
- Tejas Pebam - BCA
